Executive Council

Past-President

Michelle Frank-Crawford, Ph.D., BCBA-D, LBA

President

Jessica Becraft, Ph.D., BCBA-D, LBA

President-Elect

Justin Boyd, Ph.D., BCBA-D

Members-at-Large

Mirela Cengher, Ph.D., BCBA-D, LBA

Nathalie Fernandez, Ph.D., BCBA-D

Legislative Chair

Erin Schaller, M.A., BCBA, LBA

Community Chair

Anlara Hoskins, M.A., BCBA, LBA

Secretary

Emily Chesbrough, M.Ed., BCBA, LBA

Treasurer

Joshua Firestone, M.A., BCBA, LBA

Directors

Samantha Hardesty, Ph.D., BCBA, LBA

Sarah Haney McDevitt, Ph.D., BCBA-D

BACB Continuing Education

We will be using BehaviorLive (available for download in the appstore). Be sure to check in within the first 10 minutes of each talk and check out during the last 10 minutes. Please contact support@behaviorlive.com with any questions or if technical assistance is needed. MABA is an approved ACE provider for Type 2 CE Events. Please see the MABA staff member for assistance in the Constellation Ballroom.

CEs must be purchased separately and may not be purchased after 1/17/26. If you have not purchased CEs yet, you can purchase them on the MABA website until that date.

AM Workshop**Partnering with Families: A Family-Centered Applied Behavior Analysis (ABA) Approach**

Introduced by Justin Boyd, Kennedy Krieger Institute

An essential aspect of behavior-analytic services is collaborating with stakeholders (e.g., caregivers) to develop interventions that incorporate stakeholder preferences, needs, and contextual variables, in addition to those of the client. Recent research has called attention to potential gaps in behavior analysts' consideration of family values and dynamics when designing and implementing behavioral treatments. Family-centered care is an approach that emphasizes the client as part of a larger family system and is used in a variety of medical and mental health services to promote family-provider collaboration and improve care. This workshop will review key information pertaining to family-centered practices in behavior analysis and provide practical resources for practitioners to adopt in their own clinical settings. In addition, this workshop will actively facilitate and create intentional space for clinicians to discuss and practice the use of family-centered practices.

Dr. Katherine Brown is an assistant professor at Utah State University and Co-Director of the Behavior Support Services Clinic that provides behavioral assessment and treatment of severe challenging behaviors. She is a doctoral-level Behavior Certified Behavior Analyst (BCBA-D), as well as a Licensed Behavior Analyst (LBA) and a Licensed Clinical Mental Health Counselor (LCMHC) in the state of Utah. Her research aims to advance the assessment and intervention of severe problem behavior exhibited by individuals with intellectual and developmental disabilities. She is passionate about behavior-analysts' use of family-centered approaches to promote family-provider collaboration and improve care in behavior analysis. She is particularly interested in researching variables that impact caregiver adherence to behavior interventions, as well variables that impact the longevity and generality of behavioral treatment outcomes.

PM Workshop**Using Organizational Behavior Management (OBM) Tools to Improve Supervision in ABA Organizations**

Introduced by Kate Pudpud, UMBC

Providing effective staff supervision requires first defining the job and performance requirements, then designing and implementing training and management systems around those requirements. This workshop will introduce and provide hands-on practice in the use of performance support tools to assist supervisors in this important undertaking. Attendees will learn how to create job models and task analyses for staff performance, conduct performance assessments to determine training and performance management needs, and design effective training and performance monitoring and management systems. Opportunities for clients is an increasingly common strategy to involve clients in therapeutic decisions within behavior analysis. The purpose of this workshop is to further advance the conceptualization and understanding of assent and assent practices by refining previous definitions and conceptualizations of assent and defining essential considerations for embedding assent into practice.

Dr. Heather McGee is a professor in the Department of Psychology at Western Michigan University and chair of the industrial organizational behavior management program. She received her B.S. (1998), M.A. (2003), and Ph.D. (2004) from WMU. Dr. McGee is also co-founder of Performance Blueprints, a performance improvement consulting firm specializing in helping small businesses, non-profits & human service settings by providing a variety of consulting and training services. Dr. McGee has designed, developed and implemented organizational performance solutions in a variety of industries and settings, including autism service agencies, the pharmaceutical industry, education, and health and human services. These solutions have included performance-based instruction, performance management, behavioral systems changes, and strategic planning initiatives.

Pursuing Behavioral Inoculation Through Coordinated Basic, Translational, and Applied Research

Introduced by Vanessa Ungarino, UMBC

Although the translation of basic research findings to applied practice has been strongly encouraged in behavior analysis for decades, contemporary examples of bridging the two ends of this continuum are somewhat rare. Similarly uncommon are examples of so-called “reverse translation,” in which behavioral phenomena from the clinic, school, or other applied setting are brought into the laboratory for further empirical scrutiny. Indeed, meaningful and productive interactions between basic and applied researchers in behavior analysis appears to be severely lacking. In this presentation, I will outline how the recent increase in research on treatment relapse represents a marked departure from these troubling trends, while commenting on the ways in which this work has reinvested bidirectional research in behavior analysis. Specific examples from an ongoing collaboration between basic and applied researchers will be highlighted, as will considerations for developing new lines of collaborative research beyond that of treatment relapse in hopes that others will similarly heed these longstanding calls for greater integration of basic and applied behavioral science.

Dr. Brian D. Greer, Ph.D., BCBA-D directs the Children’s Specialized Hospital–Rutgers University Center for Autism Research, Education, and Services (CSH–RUCARES). He is a tenured associate professor in the Department of Pediatrics at Robert Wood Johnson Medical School and a core member of the Brain Health Institute at Rutgers University. He received a Bachelor of Science in psychology from the University of Florida, a Master of Arts in applied behavioral science and a Ph.D. in behavioral psychology, both from the University of Kansas. He later completed a postdoctoral fellowship at the University of Nebraska Medical Center. Dr. Greer is a current associate editor of the Journal of the Experimental Analysis of Behavior, former associate editor of the Journal of Applied Behavior Analysis, and he has served as an associate editor, guest associate editor, or guest editor for Behavioral Development, Perspectives on Behavior Science, Learning and Motivation, and Behavior Analysis in Practice. He is the 2013 recipient of the Baer, Wolf, and Risley Outstanding Graduate Student Award; the 2019 recipient of the Award of Excellence from the Heartland Association for Behavior Analysis; the 2019 recipient of the B. F. Skinner Foundation New Researcher Award; and in 2020, he was awarded Contribution of the Year from the Journal of Applied Behavior Analysis. Dr. Greer is a former Executive Director of the Society for the Quantitative Analyses of Behavior and a three-time recipient of the Loan Repayment Program Award from the National Institutes of Health. He and his colleagues have received continuous federal funding for their work since 2014.

Assessment and Treatment of Feeding Problems in Children: Developing a Starting Point for Treatment Using an Intensive Home-Based Approach

Introduced by Julianna del Cañal, UMBC

Children with feeding difficulties often face a range of challenges related to eating and drinking. For example, some children may exhibit significant behavioral issues (such as crying, aggression, or self-injury) when presented with any food or liquid, which can eventually lead to tube dependency. Other children may only demonstrate problem behaviors in response to specific foods or liquids—such as selectivity based on type, texture, or presentation format—resulting in nutritional deficiencies and potential social stigma. Additionally, some children may eat a variety of foods but in limited quantities, which can lead to poor weight gain. These feeding challenges are typically addressed by a single professional or a multidisciplinary team that may include a pediatric gastroenterologist, occupational or speech therapist, nutritionist, and/or behavioral psychologist/behavior analyst. Treatment options can take place in a clinic, hospital, or home setting. The goal of this presentation is to provide an overview of the assessment and treatment of feeding problems in children using an intensive home-based model. More specifically this presentation will highlight how clinicians can determine the starting point for treatment based on the type of feeding problem. This session is designed to help BCBA's and BCaBA's understand how feeding assessment and treatment can begin in less controlled environments, offering insights on determining the best starting point for treatment. Additionally, video recordings will be shown, illustrating a patient's journey from the start of treatment to discharge.

Dr. Patel has been working with children with autism and other disabilities for 30 years. She is a Board Certified Behavior Analyst. Dr. Patel received her PhD in Psychology with an emphasis in Behavior Analysis under the supervision of Dr. James Carr, Dr. Patrick Ghezzi, and Dr. Sidney Bijou. She completed a post-doctoral fellowship at the Kennedy Krieger Institute and Johns Hopkins University School of Medicine under the supervision of Dr. Cathleen Piazza and Dr. Wayne Fisher. Dr. Patel joined the faculty at the Marcus and Kennedy Krieger Institutes in 2001 and Emory University School of Medicine in 2002. Dr. Patel was a case manager in the Pediatric Feeding Disorders and Early Intervention Programs at the Marcus and Kennedy Krieger Institutes from 2001-2003. In 2003, she started Clinic 4 Kidz, which is a Home-Based Interdisciplinary Pediatric Feeding Disorders Program. Currently, she serves as the Executive Director of Clinic 4 Kidz. Dr. Patel is also an Adjunct Clinical Assistant Professor in the Department of Pediatrics, Division of Gastroenterology at Stanford University School of Medicine. Her research and clinical interests focus on treating feeding problems in children who have underlying medical issues or children diagnosed with avoidant/restrictive food intake disorder. In addition, she has expertise in working with children with autism and other developmental disabilities. She is currently an associate editor for *Frontiers in Child and Adolescent Psychiatry* and is on the editorial boards of *Behavior Analysis in Practice* and *Journal of Developmental and Physical Disabilities*. Dr. Patel also serves as a guest reviewer for several behavioral and pediatric journals. She has published research studies in peer-reviewed journals and has authored invited book chapters. Dr. Patel has also been invited to present at numerous conferences and at various hospitals all over the world. Dr. Patel also serves on the Board of Trustees for the Schools of the Sacred Heart, San Francisco and on she is on the Clinical Advisory Board for the MEAL PlanR project funded by the Georgia Research Alliance.

ABLLS-R, AFLS, VBMAPP, ESDM, PEAK!?!? Choosing the Right Assessment

Introduced by Melanie Gray, Verbal Beginnings

A variety of assessment options exist for identifying skills to target for learners diagnosed with Autism and other developmental disabilities. Many practitioners are trained on a specific assessment but may need more training to evaluate the appropriateness of that assessment for the learner. This presentation discusses how to individualize the assessment process to create the most effective intervention program for each learner. Additionally, video examples are provided that demonstrate how to observe a learner and assess skills without using a commercially available assessment.

Dr. Megan Miller is a globally recognized behavior analyst, author, and speaker with over 20 years of experience supporting autistic individuals and advancing the field of behavior analysis. Her work centers on translating research into individualized, person-centered practices that promote autonomy, connection, and meaningful engagement. Megan has delivered more than 100 invited presentations across five continents and is known for bringing grounded, research-informed perspectives that encourage continued learning. She is the author of two book chapters and several peer-reviewed articles, with a focus on neurodiversity-affirming, trauma-informed approaches that move the field forward. As the founder of the Do Better Collective, Megan leads an international community of behavior analysts, educators, and service providers dedicated to compassionate, evidence-aligned practice. Her work blends scientific integrity with real-world application, helping professionals build inclusive systems rooted in dignity, curiosity, and shared humanity.

Fostering Success: Collaborative Strategies for BCBAs and Educators in Schools

Introduced by Lia Vasquez Serrano, Johns Hopkins University

Collaboration between behavior analysts and school educators is crucial for creating effective and sustainable behavior support systems in educational settings. This presentation explores the significance of collaboration in schools, highlighting the benefits, challenges, and strategies for fostering productive partnerships between behavior analysts and educators. Drawing on research findings and real-world examples, the presentation emphasizes the positive impact of collaboration on student outcomes and overall school culture.

Dr. Bruce A. Tinor is a highly respected education professional known for his unwavering commitment to supporting students with diverse and complex needs. He currently serves as the Assistant Superintendent of the Saucon Valley School District in eastern Pennsylvania, where he leads district systems and organizational processes. In this role, he applies principles of Organizational Behavior Management (OBM) to drive training effectiveness, improve system efficiency, and ensure excellence in performance management. Dr. Tinor has built a distinguished career as a leader in special education, with expertise in programming and service delivery for students with autism, emotional and behavioral disorders, and intellectual disabilities. Grounded in a deep passion for the philosophical and scientific foundations of ABA, Dr. Tinor excels in key areas such as staff training, ethical decision-making, interdisciplinary collaboration, and creating environments that promote reduced maladaptive behavior and improved quality of life for students. For example, he led a successful restraint reduction initiative that significantly influenced the Pennsylvania Bureau of Special Education's model for tiered supports for students requiring emotional support services. Dr. Tinor holds a master's degree in Secondary Education from East Stroudsburg University and master's degrees in Special Education and Educational Leadership from Centenary University, along with a post-master's Education Specialist degree in Educational Leadership from Liberty University. Dr. Tinor completed his doctorate in Special Education, with a minor in Applied Behavior Analysis, at Slippery Rock University. Dr. Tinor is currently completing his Ph.D. in Behavior Analysis at Simmons University. Dr. Tinor's extensive knowledge, leadership, and passion for behavior analysis, special education, curriculum and instruction, and OBM continue to drive improvements in staff performance and, most importantly, enhance student outcomes—making a lasting and meaningful impact on the field of education.

Defining and Measuring Meaningful Outcomes in ABA Services for Autism Spectrum Disorders

Introduced by Luca Mogliazzi, UMBC

Many individuals diagnosed with autism spectrum disorder (ASD) require continuous healthcare and social services to meet their evolving needs, with lifetime costs estimated at up to \$2.4 million (Buescher et al., 2014). While many treatment modalities exist, Applied Behavior Analysis (ABA) is considered the gold standard and remains the only evidence-based practice for treating ASD. As a result, there is increasing discussion around meaningful outcomes associated with ABA services for individuals with ASD. However, there is still no industry consensus on what outcomes should be measured or how to assess meaningful impact. This session will explore two frameworks—International Consortium for Health Outcomes Measurement (ICHOM) and Behavioral Health Center of Excellence (BHCOE)—that have been developed to drive consensus on the measurement of outcomes. Additionally, the session will provide an overview of key terminology, including a discussion of quality, quality control, and quality assurance. An Early Intensive Behavioral Intervention (EIBI) model will be used as an example to offer practical guidance for measurement in practice. Finally, barriers to implementation and the need for alignment among providers, patients, and payers will be addressed.

Dr. Ivy Chong is the Chief Clinical Officer of Little Leaves Behavioral Services and brings 28 years of experience working with individuals with autism and developmental disabilities. She earned her doctorate in Behavior Analysis from Western Michigan University and later obtained an MBA in Healthcare Management from the Florida Institute of Technology. From 2017 to 2023, Ivy served as Senior Vice President of Children's Services at the May Institute. Prior to that, she held the role of Director of Autism Services and Training at the Scott Center for Autism Treatment and was an Associate Professor in the College of Psychology and Liberal Arts at the Florida Institute of Technology from 2008 to 2017. Since 2005, Ivy has been an active Subject Matter Expert with the Behavior Analyst Certification Board (BACB), where she currently serves on the board of directors and is the Treasurer.

We are a **full-time, center-based early intervention ABA therapy program** serving children 18 months to 6 years old. The children we serve are at the heart of everything we do, and our mission is to deliver the highest quality therapy to help them reach their potential to communicate, build social skills, and prepare for academic success. We are proud to be clinician-owned and founded – not backed by private equity – allowing us to keep our **#1 focus on clinical quality and supporting staff development!**

BENEFITS OF JOINING OUR TEAM:

- Starting credentialed BCBA salary of \$100k
- BCBA billable hour bonus eligibility
- 18 days of paid time off
- 9 company-paid holidays
- CEU budget and paid CEU days
- Interdisciplinary teams with SLPs & OTs
- Caseload caps of 6-8 clients
- Tuition assistance + loan forgiveness
- 401(k) with company match
- Medical, Dental, and Vision Insurance
- DashPass, Pet Insurance, EAP, and more!
- Team of full-time, salaried RBTs
- Strong supervision + exam readiness program for emerging BCBA's

Thrive with ATS

SUPPORTIVE TEAM ENVIRONMENT WITH STRONG MENTORSHIP

Each BCBA is supported by a regional Clinical Director that they meet with regularly (weekly or biweekly). Clinical Directors provide mentorship, case consultations, and host monthly team meetings to foster BCBA collaboration.

SUPPORT FROM OUR CORE CLINICAL TEAM

Our Core Clinical Team is comprised of our Director of Clinical Services and Outreach, Directors of ABA Services, Director of Treatment Integrity and Outcomes, and the Director of Quality Improvement

ONGOING PROFESSIONAL DEVELOPMENT

Our Training and Professional Development team hosts monthly CEU events including presentations and article reviews.

ETHICAL & COMPASSIONATE SERVICES

Our approach to everything is simple: People matter. We focus on services that are compassionate, ethical, and center on clinical quality. This is why we provide paid treatment planning for every client, regardless of insurance funding.

DIVERSE OPPORTUNITIES

Our BCBAs work in a variety of settings, including in-home, centers (Harford & Washington counties), schools, daycares and a variety of contract opportunities such as classroom support, parent workshops, and professional development presentations.

Poster Presentations

1. Using Behavior Skills Training to Increase the Quantity and Diversity of Choices Provided by Direct Support Staff. Kelly Owen, Emily Virok, & Natalie Mandel. Bancroft. ***Student Poster Presentation.**
2. An Evaluation of Response Blocking as a Reinforcer for Arbitrary Response: A Systematic Replication. Camila Morales, Nathalie Fernandez, Kaitlyn Connaughton, Jordyn M. Salow, & Christopher J. Ritchie. Kennedy Krieger Institute. ***Student Poster Presentation.**
3. Foundational Plan Mentorship: Successful Implementation of a Tier-One Approach to Decrease Maladaptive Behaviors. Alana Rascoe, Edward Sanabria, & Hillary Laney. Centria Autism.
4. A Comparison of Resurgence with Isolated versus Synthesized Contingencies for Multiply Maintained Challenging Behavior. Faith L. Rodriguez, Michelle Frank-Crawford, Drew Piersma, Hannah Roth, & Kate L. Pudupud. Kennedy Krieger Institute. ***Student Poster Presentation.**
5. The Assessment and Treatment of Rectal Digging/Fecal Smearing. Kate Lynne F. Pudupud, Michelle A. Frank-Crawford, Mary E. Middleton, Megan E. Ryan, Brianna L. Vaughn, & Victoria Marshall. Kennedy Krieger Institute. ***Student Poster Presentation.**
6. Using Video Modeling and Praise to Increase Turn-Taking in Two Autistic Siblings in the Home Setting. Kimberly Lemus-Flores, Jocelyn Castro, Ivanna Rodriguez, & Chellsea Garbutt. Amigo Care ABA.
7. Augmented Competing Stimulus Assessment for Genital-Directed Self-Injurious Behavior. Vanessa M. Ungarino, Emily Pereira, Nathalie Fernandez, & Kaitlyn Connaughton. Kennedy Krieger Institute. ***Student Poster Presentation.**
8. Conducting a Trial-Based Functional Analysis in the Home Setting: A Comparison with Traditional Methods. Adriana Pereira, Emily Chesbrough, Alejandro Pozo, Melissa Theodore, Alexander Arevalo, & John Huete. Amigo Care ABA.
9. The Effects of Integrating ACT into BST on Parent Adherence in ABA-Based Feeding Programs. Myra-Allyssa Maxwell & Rebecca Correll. Mount St. Mary's University. ***Student Poster Presentation.**
10. Evaluating the Effects of Monolingual and Bilingual Listener Instruction for Children with Autism. Layna Do, Shirley Zhao, & Mirela Cengher. University of Maryland, Baltimore County. ***Student Poster Presentation.**
11. Evaluating the Effects of Response Promotion and Disruption on Preference. Brianna L. Vaughn, Kate Lynne F. Pudupud, Mary E. Middleton, & Michelle A. Frank-Crawford. Kennedy Krieger Institute.
12. Buprenorphine Patient Experiences with a Contingency Management Adherence Program. Emily Lamison, Lucas Wittenburg, Shelby Goodwin, & Bethany Raiff. Rowan University. ***Student Poster Presentation.**
13. Increasing Opportunities for Social/Group Goals with a Structured Session within a Small Group. Alexandria Brehm, Gwen Pringle, & Valerie Rich. Helping Hands Family. ***Student Poster Presentation.**

Poster Presentations

14. Chaining Differential Reinforcement of Incompatible Behavior and Functional Communication Training to Decrease Frequency of Tangibly Maintained Elopement. Lauren Martone, Elizabeth Linton, Lauren Layman, Patricia Kurtz, Breanna Riffey, & Corwyn Shochet. Kennedy Krieger Institute and Johns Hopkins University School of Medicine. ***Student Poster Presentation.**
15. Comparing Positive and Negative Reinforcement Without Extinction in the Treatment of Escape-Maintained Behavior. Jocelyn Castro & Ana Delariva Avina. Amigo Care ABA.
16. Optimal Procedure for Bilingual Tact Acquisition in Children with Autism Spectrum Disorder. Ipsa Sindhvani, Xuehua Zhao, Elise Nikitina, & Mirela Cengher. University of Maryland, Baltimore County. ***Student Poster Presentation.**
17. Examining the Relation between Challenging Behavior in Preference Assessments and Functions of Challenging Behavior. Chris Edwards, Michelle A. Frank-Crawford, Carley Smith, & Nathalie Fernandez. Kennedy Krieger Institute. ***Student Poster Presentation.**
18. An Expanded Analysis of Caregiver Preference and Comprehension of Graphical Data Displays. Jonathan M. Pastor, Brittany N. Workman, Shelby L. Quigley, & Samantha L. Hardesty. Kennedy Krieger Institute.
19. Optimizing Onboarding: Reducing Employee Response Latency Through Behavior Systems Analysis. Shelby Quigley, Alexander Arevalo, & Melissa Theodore. Amigo Care ABA.
20. Addressing Staff Engagement: Exploring Mindfulness and ACT-Based Interventions for ABA Staff. Caitlin Witmer. Mount St. Mary's University. ***Student Poster Presentation.**
21. Behavioral Treatment of Ostomy Bag Removal in an Adolescent with Crohn's Disease. Erin Byard, Lauren Layman, & Trish Kurtz. Kennedy Krieger Institute.
22. Enhancing the Treatment Utility of an Augmented Competing Stimulus Assessment for a Child whose Automatically Maintained Clothes Ripping Behaviors Evidenced Sensitivity to Therapist Characteristics. Jenna M. Schechter, Guillermo A. Santamaria, Kate F. Pudpud, Roy Justin Boyd, & Amanda Groff. Kennedy Krieger Institute.
23. Picture Exchange Communication System (PECS) in Enhancing Manding Behavior for a Vocal-Verbal Learner Within a Clinical Setting. Laura Elicker. Helping Hands Family.
24. Knowing When To say Goodbye: Teaching Conversation Termination Cues to Adolescents with ASD. Pamela Martinez Gonzales, Shelby Quigley, & Melissa Theodore. Amigo Care ABA.
25. A Comparison of Milestone Gains, Parent Training, and Direct ABA Hours in Center-Based vs. In-Home Settings. Jessica VanDevander & Sarah Bendekovits. Achieving True Self.
26. Simultaneous Presentation and Bolus Fading Package: A Pediatric Feeding Case Study. Julie Cartee & Ben Sarcia. Verbal Beginnings.
27. The Effects of Preference Assessment Modality on Challenging Behavior and Preference Stability. Abigail Potter, Nathalie Fernandez, Kaitlyn Connaughton, Philippe Mazanov, Damilola Oluwole, & Genevieve Fernandez. Kennedy Krieger Institute.

Poster Presentations

28. Systematically Increasing Response Effort in PECS Training: A Single-Case Study with a Bilingual Preteen. Jocelyn Castro, Lorenzo Cruz, & Jhennifer Celestino Alva. Amigo Care ABA.
29. Cross-Language Learning at Home: Evaluating Bilingual Tact Training in Early Intervention. Alexander Arevalo, Kimberly Lemus-Flores, & Pierre Andre. Amigo Care ABA.
30. Treating Automatically Maintained Mouth-Directed Self-Injurious Behavior by Conducting an A-CSA in the Home. Jennifer Leiva, Valeria Macuare, & Colleen Guevara. Amigo Care ABA.
31. Using the Self-Injury Trauma (SIT) Scale to Guide Protective Equipment Decisions in the Assessment and Treatment of Automatically-Maintained SIB. Desiree Poole, Christopher Dillon, & Samantha Hardesty. Kennedy Krieger Institute.
32. Extension of the In-The-Moment Reinforcer Analysis to The Treatment of Severe Behavior Maintained by Access to Tangibles. Emmanuela Twumasi & Elizabeth Thuman. Kennedy Krieger Institute.
33. Using Signaled Availability to Increase Tolerance of Wet Clothing in a Child with ASD. Richard Saavedra & Shelby Quigley. Amigo Care ABA.
34. Effects of a structured Behavior Management Skills Assessment on Staff Performance in a Neurobehavioral Clinical Training Setting. Erica James & Danae' Dowd. Kennedy Krieger Institute.
35. Examining Generalization: Tact Training with Tactile vs. Visual Stimuli in Children with Autism. Nicole Burke, Adriana Pereira, Alex Arevalo, & Melissa Theodore. Amigo Care ABA.
36. Enhancing Treatment Efficacy for Covert, Automatically Maintained Clothes Ripping via Simulated Unsupervised Play Activities (SUPA). Guillermo Santamaria, Jenna Schechter, Amanda Groff, & Roy Boyd. Kennedy Krieger Institute.

PEDIATRIC FEEDING DISORDERS PROGRAM AT KENNEDY KRIEGER INSTITUTE

We are all born with great potential. Shouldn't we all have the chance to achieve it?

Who We Are

The Pediatric Feeding Disorders Program at Kennedy Krieger Institute offers a full continuum of care, including inpatient, day treatment, and outpatient treatment services. We emphasize an integrated, interdisciplinary, and collaborative approach through patient care, research, and administrative services to accomplish our mission. Our methods have become a national standard in the treatment of feeding disorders.

Who We Serve

We specialize in treating children who have feeding challenges along with other disorders or concerns, such as Autism Spectrum Disorder, Down syndrome, or premature birth. We treat infants, children, and adolescents who have a variety of feeding issues, including:

Gastroesophageal reflux disease

Failure-to-thrive

Esophagitis

Food allergies

Feeding tube dependence

Oral-motor dysfunction

Food refusal and selectivity

Tantrums at mealtimes

"We know that you probably hear this all the time, but when we came to the feeding program we were running out of options. With the persistence and proven techniques, along with the highly trained and educated staff, we were able to push through our son's extreme level of resistance. The staff worked wonderfully together as a team and were able to get him eating foods that we could only dream about.

5.0 Great place to work

★★★★★ BCBA (Current Employee)

Many companies stress company culture. Helping hands family also believes it's important to remember that companies are created by individuals with a life outside of the company and their own personal endeavors. HHF values work life balance, invests in professional development, and allows an individual to grow vertically and/or horizontally between roles within the company (because sometimes our interests change)!

5.0 Collaborative and supportive team with room for growth within the company!

★★★★★

As a BCBA, it was very important me to find a company that fit everything that I was looking for as a clinician, but Helping Hands Family is just that! Everyone is willing to collaborate and support each other. It is such a positive work atmosphere! I genuinely find myself looking forward to going to work each day. I cannot recommend HHF enough for those looking to work in applied behavior analysis (ABA)!

We Are Hiring!

Behavior Analyst Opportunities with LEARN Behavioral

National Resources and Local Support

Unparalleled Clinical Leadership

Led by Dr. Hanna Rue BCBA-D, Chief Clinical Officer

- Utilizing national training and clinical standards based on the most recent research across the network.
- Providing expert support with feeding, functional analysis, and challenging behaviors.
- Hosting monthly clinical forums for free CEUs featuring leaders in our field, including Greg Hanley, Carl Sundberg, Eileen Roscoe, William Ahearn, Mary Jane Weiss, and Kevin Luczynski, among others.

A unique BCBA Experience

- We are a proud member of the Council of Autism Service Providers (CASP) and the Association for Behavior Analysis International (ABAI). We actively support state licensure bills and attend several annual state ABA conferences.
- We handle back-end administrative tasks, such as credentialing, authorizations, scheduling, and intake, so you can focus on what matters—your clients' success.
- We extend quarterly bonus opportunities up to \$12,000 annually.
- We support quarterly team building events to create connection.
- We offer a comprehensive individual and family benefits package for full-time and part-time BCBAs.

*Programs and services throughout the lifespan
for children and adults living with autism and
related developmental disabilities*

The Linwood School, located in Ellicott City, is a non-public special education program dedicated to empowering students on the autism spectrum and related developmental disorders, from ages 6 to 21. At Linwood, every student thrives in a positive, structured, and nurturing learning environment tailored to their unique needs.

The Linwood School designs personalized educational programs built around each student's strengths and interests in order to meet the curricula and IEP goals. With a multi-disciplinary focus, we deliver wraparound services that integrate parent collaboration, academics, behavior support, related services, and vocational training—all within small class settings.

Using a variety of evidence-based strategies, including discrete trial training, small group instruction, sensory integration, social skills development, and community-based experiences, we foster multi-modal communication and building on each students' strength.

Linwood places a strong emphasis on the real-world application of skills, ensuring students can generalize what they learn across environments while building positive replacement behaviors for lifelong success.
